Detailed instruction for installing and using the application

- Download Android Studio: <https://developer.android.com/studio/index.html>
- Download the zip from GitHub: <https://github.com/samihn/HomeBody>
- Open the files in Android Studio and you would be able to run the application there
- Operating Systems: Windows, Mac, Linux
- Type of device: for testing you could either use the emulator or an android device

Known bugs, issues or limitations

- No known bugs at this time
- Issues: no API or database for me to access the data from Trulia or any other housing websites.
